

To continue to explore the escalators image

An example :

What is at stake? Describe and detail the circumstances (what, who, where, when, how, why).

How does the example work with the image? Draw on the diagram. What does it teach us ?

And if we ask some other questions?

How does this relate to health?

How are programs, policies, public budgets or taxation involved?

How could one take action here to have an effect on the escalators?
